## **COMMUTER SHELTERS ARE COMING!!**

### **NOTICE ON THE DESIGNATION OF COMMUTER SHELTERS IN THE CITY OF JOHANNESBURG**

The City of Joburg has a responsibility to establish and designate ranks, holding areas, stops, shelters and lay-bys for the provision of public transport.

The City will be rolling out new commuter shelters from October 2012 across the City and in terms of the Promotion of Administrative Justice Act members of the public are asked to comment on the location of the shelters.

Our plan is to roll out 10 shelters each month in a different suburb per region. The roll out will take two years.

We are now advertising the location of the first shelters that will be rolled out from October until the end of the calendar year.

Please look at the lists that are being published in newspapers, are on our website and will be put up at Council offices and places like libraries, clinics, etc.

### **What will the shelters look like?**

There will be two designs – depending on the number of people that will be using them and the size of the sidewalk:

#### **Landmark Shelter**

## Slimline shelter

## What are the main features of the shelters?

### **Material to be used:**

- Will not rust or fade from exposure to the elements
- Material is cool in Summer and not as cold in Winter months
- Can last for up to 20 years
- Green, environmentally friendly and energy efficient
- Biodegradable and with low carbon footprint
- Can withstand high winds

### **Design:**

- Maximum shade and wind protection
- Easy to clean and maintain
- Secure and safe for commuters waiting inside – in the land mark shelter, openings have been created in the back and on the side panel to be able to see through
- Openings around the bottom to allow for better drainage

### **Lighting:**

- LED energy saving lighting – shelter is well lit
- Some lighting will be powered by solar panels on the shelters

### **Colour:**

- Uses grey which is one of the City's corporate identity colours

**Seating:**

- Ergonomically designed comfortable individual seating with a backrest
- Place for a wheelchair or pram

**Universal access:**

- Plinth will be level with the sidewalk as far as possible.
- Wheelchair space will be at least 900mm wide and the base will be 1 in 50.

**How can you comment and object?**

If you are unhappy with the location of the shelter as a commuter, public transport operator or resident, please let us know.

You can send your comments or objections to:

- [theodorabo@joburg.org.za](mailto:theodorabo@joburg.org.za)
- Fax: 011 870 4501/2
- Post: The Executive Director: Transport, P.O. Box 30733, Braamfontein 2017
- Delivered to: 66 Sauer Street cnr Jeppe Street, Joburg.

Comments must be sent within 30 days of the appearance of the adverts in the newspapers.

We will consider your comments and let you know the outcome. We may also contact you to further discuss your comments and objection with you.
