

# Johannesburg Inner City Transport Master Plan

Plan Approved by Council

The City of Johannesburg Transport Department is pleased to announce the approval of the *Johannesburg Inner City Transport Master Plan (JICTMP)* by the Council on 12 May 2022.

The purpose of the JICTMP is to strategically guide investment by the public and private sector in transport system improvements over the next 10 years to where it is most needed and where it will have the biggest impact to unlock other opportunities that the Johannesburg Inner City node has to offer, due to its unique competitive advantage as a major mixed use and transport and cross-border trade hub.

The approved JICTMP report can be accessed on the CoJ website and/ or link below:
