The War on Potholes program was officially launched on 10 July 2025, focusing on repairing potholes and resurfacing roads in Ward 90. This initiative is part of an ambitious plan to extend these efforts to all 135 wards within the current financial year.

This project reflects Mayor Morero’s commitment, expressed during his State of the City Address, to prioritise road infrastructure, enhance mobility, and restore efficient service delivery for all Johannesburg residents. Improved roads contribute to safer commutes, making this initiative a significant step toward building a City that residents can be proud to call home.
